DRILLING EQUIPMENT - CAT DRILL

We can offer 2 CAT Bourne drills they are used for site exploration but are equally suited to methane or water well drilling. These 2 rigs are in excellent condition and are immediately available for work. The machines have been built on a CAT hull and then the Australian Bourne drill company has built drill from the ring gear up. Using top quality components through out.

Engine : CAT V6 water cooled diesel
Transmission: : Power shift
Braking System : Hydraulic
Steering : Hydraulic
Tyres : Steel tracks 760mm pad width
Max-Load : 35+ meters drill depth upto 1.5 meters diameter

Electrical System	: 24 volt
Length	: 13.8meter
Height	: 3.80meter
Width	: 3.20meter
G.V.W.	: 25,000kg

DRILLING EQUIPMENT - IVECO MARGIRUS 310D26 6x6 / Wirth Water Well Drill Rig

The Drill rigs have been used primarily as water well rigs they are fitted with mud pump and a large capacity compressor which is in a V configuration. 4 hydraulic stabilisers, ex NATO reserve stock little used. Drill capacities are as follows:

Type : B3A, Hours from overhaul : 86, Compressor : Atlas Copco V twin

Engine : Deutz V10
Transmission : ZF Manual
Braking System : Air over hydraulic
Steering :
Tyres : 12.00 x R20
Max-Load :
Electrical System : 24 volts
Length : 10.70 meters
Height : 4.00 metres
Width : 2.50 metres
G.V.W. : 17,500 Kg

DRILLING EQUIPMENT - OSHKOSH / HAULOTTE MFRD/1 4x4 DRILLING RIG

These rigs are built in France by Pinguley. They are a subsidiary branch of the Oshkosh company in the US. Making the purpose built 4x4 chassis one of the best available for this operation. The Haulotte drilling equipment has been design around the 4x4 chassis and as such they combine to make a very compact and tough 4x4 drilling unit. The drill depth of these units is upto 100meters with added pipes, at a diameter of 150mm. Fitted with compressor with air hammer. Also supplied with auger.

Engine : 6 Cylinder turbo charged diesel
developing 260hp

Transmission : Semi automatic 6 forward and 1 reverse

Braking System : Air over hydraulic

Steering : Power assisted LHD

Tyres : 16.00 x 20

Max-Load : N/A

Length : 9.75m

Height : 2.40m

G.V.W. : 16,800kg
